INSTALLATION INSTRUCTIONS

Item#23041, 23042 (New. 05/12/2010)

READ AND SAVE THESE INSTRUCTIONS

WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.

PREPARATION (Fig.1)

1. Shut off the power at the circuit breaker and remove old fixture, including the mounting hardware.
2. Carefully remove the fixture from the carton and check that all parts are included as shown in the illustration.
3. Attach Mounting Plate (A) using the Junction box Screws (B) to the Junction box. The side of the mounting plate marked “GND” must face out.
4. Place Nipple (E) on the top of Fixture Body (D).
5. Place Cap (F) and Top Font (G) over Nipple (E) and secure with Finial (H).
6. Insert Glass Panels (I) into Fixture Body (D) and secure them by Clips on the bottom.

CONNECTING THE WIRES (Fig. 2)

7. Connect the electrical wires as shown in Fig. 2, making sure that all wire connectors are secured. If your outlet box has a ground wire (green or bare copper), connect the fixture’s Ground Wire to it. Otherwise, connect the fixture’s Ground Wire directly to the mounting plate using the Green Screw provided. After the wires are connected carefully tuck them inside the Junction box.

COMPLETING THE INSTALLATION

8. Place Fixture Body (D) over Mounting Plate (A) and secure with Screws (C).
9. To prevent moisture from entering the outlet box and causing a short, use clear caulking (i.e. Indoor/Outdoor Silicone Sealant) to outline the outside of fixture back-plate where it meets the wall leaving a space at bottom to allow moisture a means to escape (Fig.3).
10. Install light bulbs (not included) in accordance with fixture specifications. **(DO NOT EXCEED THE MAXIMUM WATTAGE RATING!)**

Your installation is now complete. Return power to the junction box and test the fixture.

Note: Illustration (Fig. 1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.
